SUMMARY

Flutter Developer with 1.5+ years of experience in building scalable, high performance cross-platform apps. Skilled in Flutter, Dart, Firebase, REST APIs, and clean architecture (MVVM + BLoC). Proven track record in production-ready apps with offline-first design, real-time sync, notifications, and secure backups. Experienced in full-stack development with Node.js, Express.js, and MongoDB for seamless backend integration. Passionate about clean UI, efficient code, teamwork, and delivering impactful mobile solutions.

EDUCATION

FSc Pre Engineering

Punjab Group of Colleges Phalia Campus

📅 04/2019 - 02/2021 📍 Phalia, Punjab

Bachelor of Science in Computer Science

COMSATS University Islamabad

📅 02/2022 - 01/2026 📍 Islamabad, Pakistan

SKILLS

Flutter	Dart	Firebase	REST APIs
Clean Architecture (MVVM or MVM)		Node.js	Express.js
Agile Methodology		MongoDB	MySQL
Git	Linux	AWS	Docker
		JavaScript	

INTERESTS

 Mobile Technology Advancements Passionate about keeping up with the latest advancements in mobile technology and apps development.	 Continuous Learning and Development Dedicated to continuous learning through online courses, tech talks, and industry conferences.
 Reading Books Interested in psychology, finance, and self-improvement books such as <i>Trading in the Zone</i> and <i>Technical Analysis of the Financial Markets</i> , which help strengthen focus, discipline, and analytical skill.

PROJECTS

BrainBee

Developed an **AI-powered personalized learning app** with adaptive study plans.

Implemented **AI-generated flashcards, quizzes, summaries, and RAG-based chatbot**.

Added features like **peer battles, leaderboards, badges, and motivation system**.

Built cross-platform app with **Flutter + Node.js/Express.js + MongoDB**, designed scalable architecture.

Ecommerce App

Built a **scalable Flutter e-commerce platform** with separate customer and admin apps using **Firebase, Stripe, and GetX architecture**.

Implemented **end-to-end shopping flow**: authentication, product catalog, wishlist, cart, coupons, checkout, orders, notifications, and profile management with **local caching (Hive, GetStorage)**.

Integrated **secure Stripe payment system** via Firebase Cloud Functions including PaymentSheet, saved cards, wallet funding, and webhook-based transaction handling.

Developed **role-based admin dashboard** with analytics, order/product management, withdrawal approvals, notifications, risk alerts, exports, and audit logging.

Ride Sharing App

Built a **full-stack ride-sharing mobile app** using Flutter, Firebase, and Google Maps API with **three user roles (rider, driver, admin)**.

Implemented **real-time ride tracking** with live GPS, polyline route visualization, and **turn-by-turn voice navigation** using Google Directions API and Flutter TTS.

Developed an **admin dashboard** with Firestore live metrics, revenue analytics charts (fl_chart), ride management, and real-time user control.

Designed **smart ride-matching and communication system** with radius-based driver search, off-route rerouting, and in-app rider-driver messaging.
