PROFILE

Flutter Developer with 1.5 years of experience building scalable, high-performance cross-platform apps. Skilled in Flutter, Dart, Firebase, REST APIs, and clean architecture (MVVM, BLoC). Proven record delivering production-ready apps featuring offline-first design, real-time sync, notifications, and secure backups. Experienced in full-stack development with Node.js, Express.js, and MongoDB for seamless backend integration. Passionate about clean UI, efficient code, teamwork, and impactful mobile solutions.

TECHNICAL SKILLS

Languages & Frameworks: Flutter, Dart, JavaScript, Node.js, Express.js

Databases: MongoDB, MySQL, Firebase

Core CS Concepts: Clean Architecture (MVVM, BLoC), REST APIs, Agile Methodology

Tools & Platforms: Git, Linux, AWS, Docker

SOFT SKILLS

Teamwork - Efficient Coding - Clean UI Design - Problem Solving - Continuous Learning - Communication

PROFESSIONAL EXPERIENCE

Flutter App Developer | Various Projects

01/2022 – Present

- Developed BrainBee, an AI-powered personalized learning app with adaptive study plans, AI-generated flashcards, quizzes, RAG chatbot, and gamification (peer battles, leaderboards, badges) using Flutter, Node.js/Express.js, and MongoDB implementing scalable architecture.
- Built scalable Flutter e-commerce platform with separate customer and admin apps using Firebase, Stripe, GetX architecture; implemented full shopping flow with authentication, catalog, wishlist, cart, coupons, checkout, orders, notifications, and profile management with local caching (Hive, GetStorage). Integrated secure Stripe payments via Firebase Cloud Functions including PaymentSheet, saved cards, wallet funding, and webhook transaction handling. Created admin dashboard for order/product management, analytics, withdrawal approvals, notifications, risk alerts, exports, and audit logging.
- Created full-stack ride-sharing mobile app with Flutter, Firebase, Google Maps API supporting rider, driver, and admin roles. Features include real-time ride tracking with live GPS, polyline route visualization, turn-by-turn voice navigation (Google Directions API, Flutter TTS), admin dashboard with live Firestore metrics, revenue charts, ride/user management, and smart ride-matching with radius-based search, rerouting, and in-app messaging.

PERSONAL PROJECTS

BrainBee - Flutter, Node.js, Express.js, MongoDB

- AI-driven adaptive learning with flashcards, quizzes, chatbot and gamification features.
- Designed scalable cross-platform architecture supporting real-time sync and offline support.

Ecommerce App - Flutter, Firebase, Stripe, GetX

- Developed end-to-end shopping platform with customer and admin apps.
- Integrated secure payments and admin analytics dashboard with audit features.

Ride Sharing App - Flutter, Firebase, Google Maps API

- Built multi-role ride-sharing platform with real-time tracking, navigation, admin controls.
- Implemented smart ride-matching, off-route rerouting, and in-app rider-driver communication.

EDUCATION

FSc Pre Engineering

Punjab Group of Colleges Phalia Campus

04/2019 - 02/2021 | Phalia, Punjab

Bachelor of Science in Computer Science

COMSATS University Islamabad

02/2022 - 01/2026 | Islamabad, Pakistan
